

(a) Duty cycle with work in hand

union of model-call intervals / (wall clock – backlog-empty and unusable time)

(b) What the 38 interruptions asked for

27 campaigns · 1,548 wall-clock hours · one request every 40.7 h

60% report a broken machine or ask for authority the system should not grant itself. Only 13% are cases where work was available and the runtime could not decide how to proceed.
